

DON'T MOVE A MUSSEL

NOW IT'S THE LAW

Clean, Drain and Dry your BOAT

Follow these steps to inspect and decontaminate your watercraft or equipment of any possible "hitchhikers:" (according to AIS Director's Orders 1, 2 and 3)

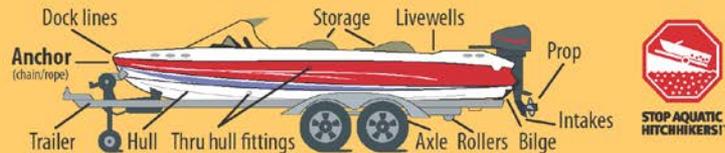

DAY USERS (boat in water for 5 days or less)

- 1. Clean** — Remove all mud, plants and animals from every part of your boat, trailer and equipment, **including your anchor.**
- 2. Drain** — **Pull the plug.** Before you leave the area, eliminate all water from your boat, including its livewells, ballast and engine-cooling water.
- 3. Dry** — Allow time for your boat to completely dry before you launch in any other waters. This amount of time may vary depending on humidity and temperature. Your boat's dry time should be at least 5 days.

LONG TERM OR MARINA-BASED USERS (boat in water for 6 days or more)

- 4. Decontaminate** — Clean your watercraft with hot, high pressure water to remove all invasive species, **such as quagga.**
- 5. Desiccate** — After decontamination leave your dried boat out of the water for 7 days in summer and 18 days in winter.

Inspect everything: if it gets wet, it could harbor mussels.

It's the right thing to do
